

## HOW TO MAKE COLD BREWED COFFEE

Gather required items for making cold brew coffee :

3 Gallon S/S dispenser

Pod/filterpack sieve with lid [805150]

Coffee pods

Ensure dispenser and sieve have been previously washed and are sanitary.

Remove the lid from S/S dispenser and pod sieve

Open coffee

Add the appropriate amount of coffee pods for recipe

Shake to settle pods into sieve

## HOW TO MAKE COLD BREWED COFFEE

Lid has a small tab and larger tab on perimeter

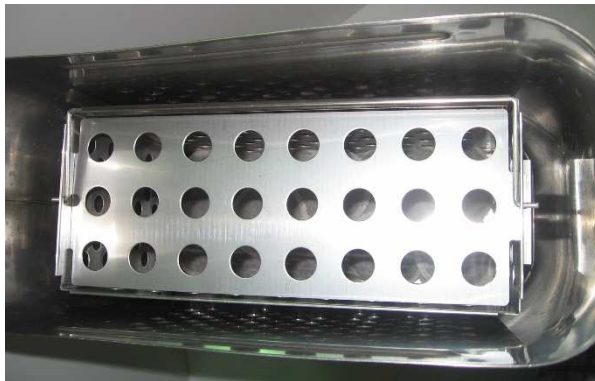

Insert small tab into small slot near top

With handle positioned upright, lower larger tab so notch in tab straddles handle.

When larger tab aligns with larger slot in sieve, slide the lid over into the slot.

Note – The lid is there to keep pods from floating above the liquid level. Some sieves may have notches at different levels to accommodate smaller recipes. The cover should be placed at the lowest level that doesn't compress the pods.

Place the sieve with pods into the 3 gallon S/S dispenser

Ensure the front of the sieve is not sitting on top of the faucet nut located internally, near the dispenser bottom.

The sieve should be centered in the container.

Fill the container with cold/ambient water to a level just covering the pods.

## HOW TO MAKE COLD BREWED COFFEE

Place the lid on the S/S container

Allow the coffee to brew for the time frame noted in the recipe (normally 12-24 hours)

You may wish to hang a brewing sign on the faucet to avoid premature use.

Once the coffee is done brewing, remove the S/S dispensers lid.

Use the handle to lift the sieve up above the liquid level.

Hold over the container.

Hold sieve over the container.

Use the built in hanging hook to attach the sieve to the upper flange of the S/S dispenser.

Allow the liquid to drip from the sieve as the pods drain.

Once drained adequately, remove the sieve.

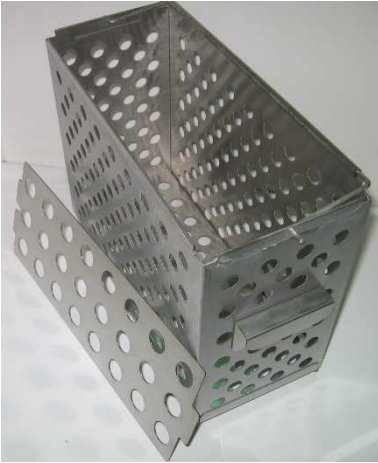

Empty sieve and set aside

## HOW TO MAKE COLD BREWED COFFEE

Add the balance of cold water and/or ice as required by the coffee recipe and stir.

Place lid on S/S dispenser and the cold brew coffee is ready to serve.

Don't forget to thoroughly clean and dry the pod sieve and store in a sanitary environment for the next use.
